REPORT TO ACCOMPANY THE ESTIMATE FOR CEMENT CONCRETING SILVER JUBILEE PARK ROAD, VTH DIVISION

The surface of this road which is tarred is very badly worn out (for the major portion of the length and is in need of urgent attention) The length of the road is nearly four furlongs The road is full of pot holes and becomes dusty and slushy during summer and winter seasons Every year heavy amount is being spent for the upkeep of the road in good condition but it is in vain due to the heavy traffic passing through this road Hence, it is proposed to lay cement concrete to this road to keep the road in good condition and thus to avoid unnecessary expenditure every year over this road Necessary provision has been made in the estimate to lay 5" thick of cement concrete for 26 feet width by employing labourers departmentally for the execution of work in an efficient manner Granite metal required for the work will be collected at the lowest approved tender rate of the division Cement will be supplied departmentally and the sand will be conveyed through departmental lorries from Kumbalgud Concrete Mixer will be used for the work Provision has been made in the allocation of 1946-47 Rates provided are all as per approved schedule and tender rates
